Office Action Summary

Under PCT restriction practice, claims wherein there is a unity of invention shall be considered as a group. Claims have a unity of invention when they are linked by a special technical feature. Thus composition, method of making and method of using claims directed to the same invention are examined together. However, applicants claim plural compositions comprising one or more different polymer matrices containing one or more actives. Each polymer matrix constitutes a unique special technical feature because each polymer and active possesses unique properties based on its structure, thus applicants must elect one ultimate polymer and active for examination. Polymers are recited in claim 8 and actives are recited in claims 8, 9.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Webman whose telephone number is 308-4432. The examiner can normally be reached on Monday-Friday 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Padmanabhan can be reached on 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are 305-3592 for regular communications and 305-1235 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1234.
